2. The following subjects of general interest were discussed:

25X1A9a

a. [REDACTED] agreed that it would be feasible from a training point of view to consolidate the un-cleared general and un-cleared special personnel under [REDACTED] until security clearances are obtained. It was determined that unless over-riding objections from the operating offices were made this would be done. Particularly sensitive individuals could be handled separately. [REDACTED] is to prepare a draft of a memorandum from Col. Baird to [REDACTED] proposing this procedure.

b. [REDACTED] called attention to the DDA staff meeting of Monday 13 September in which it was brought out that the General still stressed quality over quantity in personnel and that he was not going to approve any wholesale increase in the personnel ceiling that he established last year. This, however, did not have any direct relationship to our proposed T/O.

c. [REDACTED] were to get together on the Instructor's Course now being given by [REDACTED] particularly with respect to possible enlargement of the course to provide certain instructive material for TR(G) personnel.
